

EZ Dowel™ System

Superior Load Transfer System

The EZDowel™ load transfer plate dowel is designed to provide superior load transfer while saving time and labor during the installation process.

The EZDowel™ helps you:

- Limit your Liability
- Reduce your call back and save labor
- Optimize the amount of steel in a project
- Collect your retainage
- Deliver cost-effective slabs-on-ground

This product meets all ACI 302, 330 and 360 Recommendations and specifications.

Fast and Easy Installation

- The EZDowel™ simply slides into the plastic dowel holder installation, misalignment, deflection or compression
- Eliminates drilling bulkheads, greasing/spinning dowels and installing round dowels into plastic holders
- Allows for easy stripping of forms
- Ensures positive load transfer and eliminates cracking from restraint with reliable dowel alignment
- Unique shapes allow for better consolidation

EZ Dowel™ System Specifications

- All EZDowel™ construction joint systems will be supplied by McTech Group Inc. 866-913-8363
- EZDowel™ plate dowels will be cut from hot rolled plate per ASTM A36 to within 0.010" of specified size.
- EZDowel™ sleeves shall be molded from no break polypropylene.
- EZDowel™ is available in 3/8, 1/2 and 3/4-inch thicknesses.
